July 2021

Pre-Camp PCR TEST and Arrival Rapid Antigen Test

Dear Camp Families,

Just a few reminders regarding Pre-Camp Testing.

1. Book your camper's PCR Pre-Camp test now so that testing can fall within 72 hours of arrival to Camp Ak-O-Mak. (Arrival days are Wednesday July 21st and Saturday August 14th).
2. **Pre-Camp** Covid PCR testing IS COVERED by the government for all campers and staff attending a summer camp in Ontario. Tests can be booked at the usual assessment centres, plus community labs and participating pharmacies. You can google "COVID 19 TESTING LOCATIONS" for a list of sites near you.
3. Please bring proof of your negative Covid test when you come to camp.
4. Arrival Day: all campers will answer a screening questionnaire, have their temperature checked and undergo a Rapid Antigen swab as a final check.
5. A negative Rapid Antigen test: means we can off-load your luggage and the folks can go!
6. A positive Rapid Antigen test: means a back up Saliva PCR test will be done to confirm status. Since results of the PCR test take 24-48 hrs (processed at Toronto Sick Kids' Hospital), the camper will stay with her family OFF SITE until cleared for admission to camp.
